WHOLESALE LIST

Terms and Conditions of Sale

This List Cancels All Previous Quotations

TERMS:

All prices are f.o.b. San Gabriel, Calif., boxing and baling at cost. Packing free on truck and carload shipments.

Note: On each catalog page we list the FREE DELIVERY ZONE BY OUR TRUCKS.

Usual trade terms to nurserymen of established credit, otherwise C.O.D. Terms are, net 60 days. Interest charged on overdue accounts. 5% Discount on cash and carry orders over \$10.00.

CLAIMS:

For any cause claims must be made within ten days of receipt of stock.

GUARANTEE:

We accept all orders subject to crop conditions, and we reserve the right to cancel a portion of the stock, or all thereof, should injury befall our stock from hail, windstorm, frost, other weather conditions, error in count, insect and disease injury, or other natural causes beyond our control. We are careful to keep our varieties true to name and will replace any portion of the stock that may prove otherwise, or refund the price paid for such portions. It is agreed that the original price shall be the maximum damages the purchaser is entitled to.

A FEW OF OUR EXTRA SERVICES OR HELPS TO YOU:

We supply free of charge, fruit tree tags for each tree, giving description of fruit, and ripening dates, to save you time in selling trees.

We deliver all bareroot stock, shade trees, fruit trees, shrubs, grapevines, etc., with roots heavily covered with wet shingletow, so that your order arrives at your nursery, whether in our district or out of state, in prime, moist condition. Our customers greatly appreciate this extra care in delivery of deciduous stock. (We can also supply baled shingletow for your own use.)

OUR LOCATION:

Office, warehouse and yard—5 blocks east of corner of San Gabriel Blvd and Las Tunas Blvd., 200 feet north of Las Tunas on Vista St., San Gabriel.

Growing grounds—(deciduous trees, shrubs, etc.) 10 miles northeast of Escondido, Calif., (San Diego County) off U. S. 395 Highway.

5 % DISCOUNT

F O R C A S H O N D E L I V E R Y

Due to increased interest rates, now being charged, we feel it is Advantageous to offer our customers this discount when

CASH is paid at the time of "DELIVERY".

This will enable the "better operators" to make more money.

I N T E R E S T C H A R G E D

Our policy of charging 1% interest per month on accounts over 60 days is going to be more rigidly adhered to, which will encourage slow paying accounts to pay more promptly.

L O N G E R T E R M S O F F E R E D

Those nurserymen interested in obtaining longer terms, at bank rates, may do so by taking advantage of our Trade Acceptance Plan. Ask us for details.

These are the fields that produce our "Blue Label" quality shade trees.

Rich, deep alluvial soil, rich in compost. Located in Northeast San Diego County. Off of 395 Highway, 10 miles North-east of Escondido, 60 miles Southwest of Riverside.

Stop in--you are invited. . . .

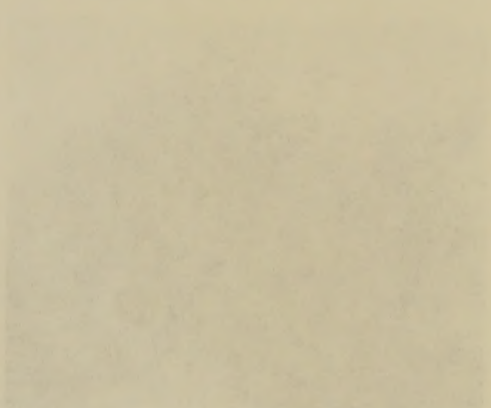

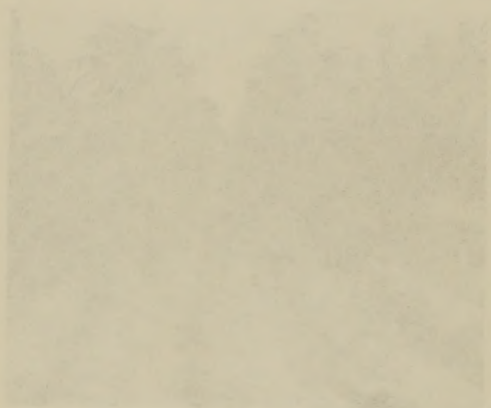

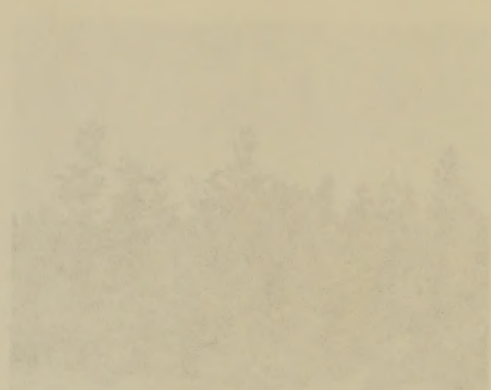

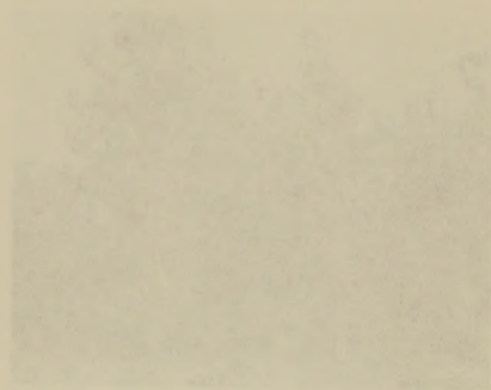

Four Views of Trees in our San Joaquin Valley Field.

Here we grow our fruit trees plus varieties of shade trees and deciduous shrubs that grow better here than at our San Diego County field, assuring you of the best growing environment for each variety.

In this catalog, we present the finest trees that extra effort in time, expense and labor can produce.

Note our use of Plastic Tree Ties on Idaho Locust in lower right hand picture. (This is why you never receive a girdled tree from us.)

Four Views of Trees in our San Joaquin Valley Field

Here we grow our fruit trees plus varieties of shade trees and deciduous shrubs that grow better here than at our San Diego County field, assuring you of the best growing environment for each variety. In this catalog, we present the finest trees that extra effort in time, expense and labor can produce.

Note our use of Plastic Tree Ties on Idaho Forest in lower right hand picture. (This is why you never receive a girdled tree from us.)

We know this picture is a bit puzzling to you. This is an old style way of us doing something modern and new to deciduous trees.

The young feller (We call him the "DIP") has just immersed a bundle of Fruitless Mulberry in "WILT PRUF."

Wilt Pruf is a liquid plastic that dries on the tree trunk and limbs, is invisible, and has proven a terrific deterrent to drying out of deciduous stock.

This season we dipped all Fruitless Mulberry and Fig trees, and plans are made to extend this to include other difficult trees, such as larger sizes in White Birch.

(We suggest you try these items, set them alongside stock that has given you trouble in the past. It will surprise you. A notable example of this is Figs.)

DISCRIPTION OF THE PATENTED

F R U I T T R E E S

ARMSTRONG VARIETIES:

PETTINGILL P.P.1352. Large rounded, deep red skin with yellow stripes. A good crisp, juicy apple. Good for eating fresh and for sauce, or pie. Does well in milder winter areas. Ripens late August.

NUGGET P.P.1651. Large, red-cheeked fruit with a orange-colored flesh and a good juicy rich flavor. Ripens a few days ahead of Royal. Late June.

REEVES P.P.693. A wonderful variety for mild winter climates. It should be planted with a pollinizer: Royal is suggested. Ripens early June.

PANAMINT P.P.1100. A big deep red skin, yellow fleshed freestone nectarine. A heavy bearer almost anywhere in California. Preferable to Pioneer for coastal areas. Ripening from early to mid July.

PIONEER P.P.787. The firm, juicy, orange-colored, honey-sweet flesh and the dark red skin make this a favorite nectarine. In spring it is loaded with great big beautiful rosy-pink blooms. Ripens late July.

SILVERLODE P.P.1023. Large size, early ripening freestone nectarine. Brilliant scarlet skin over creamy white and juicy flesh. Rich nectarine flavor. Does well in Southern California and Arizona. Ripens late June.

GOLDEN BLUSH P.P.473. Extremely large yellow golden flesh and skin with red blush. A vigorous grower and heavy bearer, that is freestone. Ripens early August.

MEADOW LARK P.P.528. A good costal and mild-winter area peach. Big golden flesh and skin with red blush. Ripens late June.

REDWING P.P.621. A large white fleshed peach, used in mild winter areas. Ripens early July.

ROBIN P.P.529. An early, crisp, white fleshed peach of honey sweet flavor. An excellent commercial peach. Ripens late May.

SATURN P.P.1485. A fruiting-Flowering peach that is better than ever. The large double pink blossoms, set delicious golden yellow fleshed freestone peaches. Ripens mid July.

SPRINGTIME P.P.1268. A white fleshed semi-freestone that will ripen ten days earlier than Robin. Earliness and quality make this an ideal commercial peach. Ripens mid May.

STRIBLING VARIETIES:

BLAZING GOLD P.P.1127. An early, yellow fleshed, freestone with a rich tart acid flavor. Ripens 35 days before Early Elberta. Ripens late May.

FREEDOM P.P.1161. It's large size, rich coloring, freestone characteristic and excellent flavor make it an outstanding nectarine. A good shipping, canning, or home use fruit. Ripens late July.

GOLD DUST P.P.1144. A vigorous grower and consistent bearer. The developers believe this to be the finest early yellow fleshed freestone. Ripens 40 days before Elberta and is non acid. Ripens early June.

DAILY NEWS PEACHES:

3 STAR. Flowering and fruiting peach. Flowers, dark pink double, 16 to 20 petals. Fruit, large yellow fleshed freestone. Ripens Aug. 1, to Aug. 15.

4 STAR. Flowering and fruiting peach. Flowers, salmon-pink, double 15 to eighteen petals. Fruit highly colored deep red, white fleshed freestone. Ripens June 15 to July 1.

SPECIAL

WHITE BIRCH CLUMPS - and

WHITE BIRCH SINGLE TREES

Our field of White Birch for this season is the finest, and the largest we have ever grown.

All sizes will be available, including the large 12-14 foot size.

Prices have been reduced on Clump Birch as much as 50¢ per clump, making them a more attractive retail seller.

Now, if you have had a survival problem on big size Birch in previous years, let us tell you of our modernized procedure on this difficult item.

FIRST-Proper growing, plus care in digging, grading and bundling, is an assurance to you that our trees are properly handled.

SECOND-With our lavish use of moist Shingletow, you can be certain that they are never processed in a dry condition.

THIRD-In addition to care in handling, each large Birch tree will be dipped in "Wilt Pruf" solution, to further guarantee proper growth, and each bundle will display a "Wilt Pruf" protected label.

Be assured, this is not an experiment-it is an established fact, as we have gone through one season with all of our Figs and Mulberry trees "Wilt Prufed."

All reports from our nurseries were as follows. "Never lost a Fig Tree." "All Mulberries leafed out." "No die back of any kind." "Best Darn Thing you ever did for bare root stock." Again let us say, that if you have had a "Survival" problem on large Birch-(Also, Figs and Mulberries) let us help you solve this problem this coming season with our "Wilt Pruf" trees.

Note the picture of this dipping process on another page of this catalog.

This is an added protection to you, at no additional cost.

You'll be proud of this graceful aristocrat of ornamental shade trees

©Plant Patent No. 1313
Gleditsia triacanthos inermis aurea

Dramatic New Coloring. SUNBURST is the first new tree color in years. Its bright, golden yellow branch tips, in rich contrast with the deep green inner foliage, make it look like a flowering tree bursting with bloom. And SUNBURST keeps this beautiful spring appearance all summer long.

Stately Form. Experts recognize the Honeylocust as the successor to the Elm. The new SUNBURST grows with a natural eye-pleasing symmetry unmatched by any other Honeylocust.

Easy to Grow. You'll have no trouble with SUNBURST, it's easy to plant and grows rapidly in almost any soil. Exceptionally hardy, it withstands extremes of heat and cold, moisture and drought. SUNBURST is one of the strongest trees known and readily survives ice, snow and windstorms. It is practically immune to disease and insects.

Ideal for Lawns. SUNBURST gives you a lacy, sun-dappled shade that actually benefits a fine lawn. Being absolutely seedless, it causes no ground litter of unsightly seed pods. And you don't even have to rake leaves in autumn because SUNBURST's small, compound leaves quickly crumble and disappear into the grass.

← Picture this colorful SUNBURST on your lawn. This five-year-old, 12-foot specimen will grow rapidly to 35 to 40 feet.

Shade trees are the most permanent feature of your "outdoor architecture." Don't wait another year to plant your SUNBURSTS. The supply of this new tree is limited so order yours now to be sure of delivery at proper planting time.

Now you can
add this spectacular

NEW COLOR

to your home landscape

SHADE TREES

Page 9

WILLOW, GOLDEN WEeping

10 Rate 100 Rate

Salix, Niobe.

Growth is same as babylonica with bright golden yellow bark.

3-4 ft.70	.60
4-5 ft.90	.80
5-6 ft.	1.10	1.00
6-8 ft.	1.30	1.10
8-10 ft.	1.60	1.50
10-12 ft.	2.00	1.80

WILLOW, WEEPING WISCONSIN

Salix, Wisconsin.

Grows taller and a little more upright than Babylonica.

3-4 ft.70	.60
4-5 ft.90	.80
5-6 ft.	1.10	1.00
6-8 ft.	1.30	1.10
8-10 ft.	1.60	1.50
10-12 ft.	2.00	1.80

WILLOW, CORKSCREW

Salix, Contorta.

Branches, both large and small, grow upward with an exotic corkscrew twist. Good novelty tree.

4-5 ft.	1.10	1.00
5-6 ft.	1.30	1.20

ZELKOVA, SERRATA

This tree resembles an Elm, but is not host to most of the pest of Elm. Hardier, but a little slower growing.

3-4 ft.80	.70
4-5 ft.	1.10	1.00
5-6 ft.	1.30	1.20
6-8 ft.	1.60	1.50

WILT-PRUF

THE AMAZING NEW LIQUID PLASTIC SPRAY FOR
RETARDING WATER LOSS AND WILTING IN PLANTS !

USE WILT-PRUF for complete protection of your nursery stock.

WILT-PRUF prevents: Injuries caused by wind-burn, sun-burn, sun-scorch and salt spray!

USE IT-to protect valuable plant material in summer and winter!

AVOID-losses due to wilt and set back by using it as an anti-transpirant before transplanting!

SELL WILT PRUF YEAR 'ROUND..

YOUR CUSTOMERS NEED WILT-PRUF, TOO. To preserve Christmas trees, decorative greens, and add shine and lustre to indoor plant material!

ALSO, as an anti-transpirant for transplanting when they wish!

NOTE--We have used this material ourselves, on our own deciduous trees, to prevent losses in handling, and the results are very gratifying, thus, encouraging us to use it more extensively in the future.

4. DELIVERY DATE: AVAILABLE YEAR-ROUND.

PLASTIC PLANT TIES

A VINYL PLASTIC FOR TYING OF NURSERY STOCK.

We have used this tape for four years in our Escondido Shade Tree field, and have had the following results--

Our trees are never girdled, as the vinyl tape stretches with the tree.

It is unnecessary to cut and retie each tree, as is the case with twine, raffia, or non-stretching materials, thus saving more than the cost of the tape.

We have yet to see this tape rot, and it holds very nicely through one whole season.

Also, it ties fast and is cheap in cost, and it is attractive in appearance.

In this past year the plant tie has proven to be a very good retail item plus the fact that landscapers and gardeners are finding many good time saving and practical uses for the tape.

SOIL HEATING EQUIPMENT

IN PRODUCING STRONG, HEALTHY PLANTS--WHETHER ORNAMENTALS, FLOWERS, OR VEGETABLES--IDEAL SOIL TEMPERATURES ARE DESIRABLE DURING GERMINATION OF SEEDS, ROOTING OF CUTTINGS, AND IN THE EARLY GROWTH STAGES. RESULTING PLANTS CAN BE SET OUT FAR EARLIER, AND BE MORE QUICKLY READY FOR SALE.

THERMOSTATS ARE AVAILABLE WITH OUTLETS FOR PLUGGING IN TWO OR MORE CABLES OR WITH CONDUIT CONNECTIONS. CHOOSE FOR YOUR NEEDS.

HSC-6	20 AMPS. READY TO PLUG IN TWO CABLES. \$20.00
HSC-5	20 AMPS. FOR USE IN CONDUIT LINE ONLY. 15.00 (FOR LARGE INSTALLATIONS ONLY.)
277-1101 . . .	24 AMPS. (SPLIT POLES-48 AMPS.) 26.95 (FOR USE IN CONDUIT LINE ONLY.)

NOW AVAILABLE, ALL READY TO PLUG IN, ARE THE NEW PLASTIC COVERED CABLES. PHONE OR WRITE US AND WE WILL HELP YOU DECIDE WHICH TO USE.

LENGTH	AMPERES	VOLTAGE	HEAT COVERAGE	PRICE
26 Ft.	1.12	110	13 Sq. Ft. of Bench	\$ 5.75
40 Ft.	1.72	110	20 Sq. Ft. of Bench	7.50
60 Ft.	2.63	110	28 Sq. Ft. of Bench	10.00
100 Ft.	4.11	110	40 Sq. Ft. of Bench	14.50

TO HEAT A LARGER AREA OF BENCH OR SOIL, ON SPECIAL ORDER, WE CAN SUPPLY BULK CABLE ON ROLLS UP TO A MAXIMUM OF 1400 FEET OR COVERAGE UP TO 350 SQUARE FEET. CABLES ARE AVAILABLE AT 110 VOLTS OR 220 VOLTS.

LET US KNOW THE SQUARE FOOTAGE AND VOLTAGE AND WE CAN SEND YOU THE CORRECT CABLE.

3. ALL ORDERS F.O.B. SAN GABRIEL, CALIFORNIA.
4. DELIVERY DATE: AVAILABLE YEAR-ROUND.

SOIL HEATING CABLE INSTALLATION INSTRUCTIONS

- I. Direct Earth Burial:
A trench must be dug in order to bury the cable below the cultivating line. Enough cable should be used to maintain the temperature desired at the lowest mean temperature of the area.
- II. Propagating Tables: (Pots or Flats.)
One of the methods used with best results is the use of two inches of Vermiculite or Perlite (Sponge Rock) on the bottom, then spread a thin layer of sand on top. Lay out cable as explained in "Separate Instructions" then spread three inches of fine sand for flats or four to five inches for pot burial.
- III. Propagating Tables. (Cuttings)
Use two inches of Vermiculite or Perlite (Sponge Rock) on the bottom then spread one-half inch of fine sand, lay cable on top, and then cover with another one-half inch of fine sand. Next put Plastic Fly Screen and then spread four inches or so of rooting mix. Reasons for Plastic Fly Screen: It will keep sand and mix separate so that you can change growing mix without disturbing the cables. It will cause the roots to spread and not become tap roots and will stop the roots from going to the heat of the cable and becoming burned.

SPECIAL INSTRUCTIONS

- I. The cables should never be imbedded in any insulating material such as humus, perlite, etc., because the heat will not be uniform. Fine sand will give a more uniform temperature spread.
- II. All of the heating cable must be imbedded, and not left on surface.
- III. If used on table a ground wire running the length of the bench is recommended.
- IV. The cable should never be cut. Order the cable to fit the job.

CABLE FORMULA

To determine length of cable needed:

0-30 sq. ft. of Bench Area X 2 = Length of Cable.
35-95 sq. ft. of Bench Area X $2\frac{1}{3}$ = Length of Cable.
100 sq. ft. & Up of Bench Area X $2\frac{1}{2}$ = Length of Cable.

CABLE LAYOUT

A 26' - 60' cable should be layed out with three inches from side of table, and six inch centers. (6" from cable to cable.)

A 100' to 250' cable should be layed out with $2\frac{1}{2}$ inches from side of table and $5\frac{1}{2}$ inch center.

A 300' and up cable should be layed out with $2\frac{1}{2}$ inches from side of table and 5 inch centers.

SUPPLIES

NURSERY TWINE

PRICES AS FOLLOWS, EFFECTIVE MAY 1, 1958. ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE. PACKED TEN (10) 5 LB. BALLS PER BALE.

1 BALE	\$12.50 Each.
5 BALES	11.50 Each.
10 BALES	11.00 Each.
25 BALES	10.75 Each.

PAPER POTS

WE ARE AUTHORIZED DISTRIBUTORS FOR "BIRD & SON" NEPONSET PAPER POTS. RED POTS ARE USED FOR SHIPPING AND FOR GROWING PERENNIALS.

SIZE		QUANTITY PER CASE	PRICE PER 1000
2	Inch	1000	\$ 9.00
2 $\frac{1}{4}$	Inch	1000	9.50
2 $\frac{1}{2}$	Inch	1000	9.75
3	Inch	1000	10.25
4	Inch	500	16.50
5	Inch	500	20.50
6	Inch	500	25.75

SHINGLE TOW

BALED CEDAR SHAVINGS

IDEAL FOR PACKING, AND FOR STORING BAREROOT DECIDUOUS STOCK.

PRICED	DELIVERED, OR	F.O.B. OUR WAREHOUSE
